142-2 Universal wiper arm puller with Ø jaw opening, 65 mm overall height

DESCRIPTION

The universal pullers of series 142 are used for removing stuck, rusted, and recessed windshield wiper arms in the automotive sector. The optimal bell shape and easy adjustability make the puller applicable for most models of common windshield wiper arms.

APPLICATION AREA

To remove stuck, rusted, and deeply embedded windshield wiper arms in the automotive sector.

BENEFIT

- Suitable for windshields and rear windows where the wiper water hose passes through the hub.
- The choice of special threads allows for particularly high pulling forces.
- Particularly gentle removal thanks to a special pressure piece on the spindle
- Anti-slip safety (spindle neck) for safe working with wrench
- Spindle outlet for thread protection

OPERATION

- Pull the jaws apart and slide them under the component
- Attach the puller to the wiper arm
- Operate the spindle to loosen and pull off the wiper arm

MASTER DATA

GTIN [GTIN]	4021176555602
Country of origin	DE
Material	Tool steel
Series	142
Gross weight [kg]	0,26 kg
