728K-A01 Retaining ring pliers for external rings, bent, for circlips Ø 3-10 mm

DESCRIPTION

Retaining ring pliers for external circlips are used for assembling and removing circlips on shafts in crafts, industry, and workshops. The simple, yet powerfully forged design enables safe and fast work in every application. The 728 series impresses with its variability. Depending on the diameter of the external circlip, the retaining ring pliers are available in various sizes and thus allow an application-specific approach.

APPLICATION AREA

For the assembly and disassembly of circlips on shafts in crafts, industry, and workshops.

BENEFIT

- The tips are stable and slip-resistant; even in hard-to-reach places, you can work comfortably with the pliers.
- The pivot and the tips are oil-hardened, forged from chrome-vanadium steel, and possess high durability and toughness.
- The form provides an unobstructed view of the work peaks.

OPERATION

- Insert pliers into the bore of the circlip
- Remove circlip securely by operating the pliers

MASTER DATA

GTIN [GTIN]	4021176004360
Country of origin	TW
Material	Tool steel
Series	728-A-1
Gross weight [kg]	0,095 kg
Package contents	1 piece
Packaging Act	PAPPE PAP 21
Worldwide sales capability	Yes (REACH, RoHS, POP, PROP65, TSCA)
