25-A 8-piece ball bearing puller set with counter stay Ø 12-46 mm

DETAIL IMAGE

DESCRIPTION

The 8-piece ball bearing puller set 25-A is used for pulling internal bearings, bearing outer rings, and bushings in crafts, industry, and workshops. The set includes internal pullers and counter stays. The multi-layered design of the internal pullers with their extra-large gripping edges allows for the safe extraction of internal parts, and together with the counter stays, internal parts can be safely removed.

APPLICATION AREA

To remove internal bearings, outer bearing rings, and bushings in crafts, industry, and workshop.

BENEFIT

- Application-oriented assembly for universal use
- By storing it in the box, the completeness of the set can be easily overviewed.
- The internal extractors, together with the counter stays, are able to find a suitable answer in various extraction situations.
- The sets are designed for various application fields and widths, allowing a wide range of options for internal extraction.

OPERATION

- Determine the inner diameter of the ball bearing and select the appropriate internal extractor
- Insert the internal extractor into the bore and tighten the clamping nut
- If there is a support surface, select the counter stay; otherwise, choose the sliding hammer
- Support the counter stay on the housing and screw it onto the spindle of the internal extractor
- Hold the handle of the counter stay and safely pull out the bearing by tightening the nut
- Tighten the clamping nut while pulling out
