34-1 Universal puller for steering wheels with large puller slots, up to 90 mm spread

DESCRIPTION

The 2-jaw puller is used for pulling steering wheels with large pull slots and hard-to-reach components. The variant 34-0 is equipped with a pair of short jaws. The model 34-1 has an additional pair of long jaws. Due to their construction, the jaws are adjustable in any direction. Thanks to the sturdy design of the puller, it can reach into large pull slots to access the steering wheel.

APPLICATION AREA

To remove steering wheels with large puller slots.

BENEFIT

- Anti-slip safety (spindle neck) at the spindle head for safe working with wrench.
- Spindle outlet to protect the thread
- Separate protective cap for the steering shaft thread is attached

OPERATION

- Remove the airbag to be able to remove the steering wheel
- Loosen the nut or screw that holds the steering wheel
- Insert the puller jaws through the large puller slots
- Position the jaws below the steering wheel correctly
- Rotate the hexagon on the spindle head with a ratchet or a box wrench until the component is loosened
