MICRO Micro-Puller for small parts, model making, up to 10 mm spread, 10 mm reach, net weight 0,085 kg

DESCRIPTION

The micro puller is used for removing speedometer cables, pressure gauges, clocks, and similar parts. Especially in model making, the small parts puller is a helpful and reliable tool. The handy and space-saving model features narrow gripping jaws and a particularly fine spindle tip, making it suitable for very tight, hard-to-reach areas. The freely movable pin on the T-handle ensures comfortable one-handed tightening of the spindle in confined spaces.

APPLICATION AREA

To remove speedometer cables, pressure gauges, clocks, and similar parts.

BENEFIT

- Integrated, free-moving pen on the T handle ensures manual spindle drive in the tightest spaces
- Compact and handy design for precise work in tight spaces
- Narrow gripping jaws reach even the tightest spaces.
- Particularly fine spindle tip for delicate extraction

OPERATION

- Slide the jaws under the part to be removed
- Manually pull the spindle for fixation
- Move the T-handle on the spindle head until the component is released

MASTER DATA

GTIN [GTIN]	4021176974755
Country of origin	DE
Material	Tool steel
Series	Micro
Gross weight [kg]	0,085 kg
Package contents	1 piece
Packaging Act	Rezykkat rHDPE 61
Worldwide sales capability	Yes (REACH, RoHS, POP, PROP65, TSCA)

SPARE PARTS
