15-A 4-piece pulling device set with separation diameter 8 mm - 75 mm & reach 300 mm

DESCRIPTION

The 4-piece pulling device set 15-A is used in trade, industry, and workshops for Pulling ball bearings, roller bearings, inner rings, and other flat-lying parts when there is not enough space for jaws. The separating and Pulling process is able to first gently separate those parts before they can be pulled from the outside. This 4-piece set includes one pulling device and one puller as well as a pair of extensions, ensuring the full range of applications.

APPLICATION AREA

To pull ball bearings, roller bearings, inner rings, and other flush-mounted parts in craft, industry, and workshop.

BENEFIT

- Application-oriented assembly for universal use
- By storing it in the box, the completeness of the set can be easily overviewed.
- The sharp edges enable peeling where other peeling methods are not applicable.
- By screwing together the separating and pulling device, the highest stability during pulling is ensured.
- If the separators are screwed into the puller device the other way around, the supporting surface is enlarged and removed more gently.

OPERATION

- Press the sharp cutting edges of the pulling device behind the part
- Using the pressure spindle, clamp the separating jaws by evenly tightening the adjusting nuts on the side bolts of the pulling device and make sure that the separating knives sit to the stop under the part to be pulled off
- Screw the side screws of the puller into the threaded holes of the pulling device to the stop
- Hold the pulling device and pull off the part safely and carefully by tightening the clamping nut

MASTER DATA

GTIN [GTIN]	4021176007521
Country of origin	DE
Material	Tool steel
Series	K-15
Gross weight [kg]	4,4 kg
Package contents	1 set
Packaging Act	PAPPE PAP 21
Worldwide sales capability	Yes (REACH, RoHS, POP, PROP65, TSCA)

SPARE PARTS

- 015145_Side bolt with nut
- 018265_side screw
- 15-1_Pulling device
- 18-1_Extractor Device
- 18-1-T_Crossbar
- 19-1-P_2 Extensions for pullers
