222-1 Seal ring removal tool, length 430 mm

DESCRIPTION

The seal ring puller tool with sliding hammer and extensions 222-1 is used for removing radial shaft seal rings, axial shaft seal rings, sealing sleeves, and other bearing seals in crafts, industry, and workshops. The seal ring puller tool with sliding hammer is used when a shaft is present and direct access to the seal ring is not possible. It is ideal for applications where space is limited.

APPLICATION AREA

To remove radial shaft seals, axial shaft seals, sealing rings, and other bearing seals in crafts, industry, and workshops.

BENEFIT

- Sliding hammer guarantees contactless disassembly in confined spaces.
- The ejector lever can be used universally in situations where the necessary space is available

OPERATION

<\/p>For seal rings with little space, first pierce a hole in the flat surface of the seal ring with the pick
- Screw the thread adapter with the large threaded side into the hole
- Mount the sliding hammer and use it with a striking motion to pull out the seal ring
