K-2030-20xS 15-piece universal puller set (2-jaw and 3-jaw) with two different puller jaw types

DESCRIPTION

The 15-piece universal puller set with two different types of puller jaws from series 2030 is used for universal applications in 2-jaw and 3-jaw pulling of gear wheels, bearings, pinions, and synchronizers in craft, industry, and workshop. The series 2030 impresses with its versatile combination possibilities. This set contains the basic equipment of 2-jaw and 3-jaw pullers with various puller jaws for universal use. The robust design is particularly suitable for large and heavy applications in industry and commercial vehicles. The kit allows for the assembly of 14 different variants through the combination of puller jaws and extensions.

APPLICATION AREA

For universal use when removing gear wheels, bearings, sprockets, and synchronizers in crafts, industry, and workshops.

BENEFIT

- Application-oriented assembly for universal use
- By storing it in the box, the completeness of the set can be easily overviewed.
- Depending on the given pull-off situation, easily adjustable and configurable for a variety of applications.
- With 2-jaw or 3-jaw, you are always flexible in use.
- Through the included extensions, the 2-jaw pullers can be combined up to a reach of 600 mm and the 3-jaw pullers up to a reach of 450 mm.
- The TiN coating provides better friction and ensures a smooth rotation of the spindle tip.
- If lowering the spindle is not possible without issues, the pressure piece assemblies of the series 600 are recommended.

OPERATION

- Position the puller jaws from the outside onto the part to be removed
- Push the claws under the component
- Use a wrench to secure the jaws
- Manually apply pressure to the spindle for fixation
- Set the hexagon on the spindle head in motion with a ratchet or open-end wrench until the component is released
