K-68-A Multi-side bolt puller set, up to 110 mm spread and 100 mm reach

DESCRIPTION

The multi-side bolt puller set K-68-A is used for pulling components with threaded holes. The tension and pressure set impresses with the KUKKO Power Nut Technology integrated into the crossbar, enabling force application that would otherwise only be achievable through hydraulics. The position of the power nut can be changed instantly with a push button. When the power nut is mounted above the crossbar, increased tension force is achieved. Three small magnets are attached to the foot of the crossbar to align and secure the power nut. The multi-crossbar allows up to three side screws to be attached for even more uniform force distribution. For precise adjustment assistance, there is a scale with numerical values on the crossbar. Various pressure pieces can be used for individual adaptation to the shaft.

APPLICATION AREA

To remove components with threaded holes

BENEFIT

- The sentence covers a variety of common standard threads for adapting the puller device.
- The multi-traverse of series 68 enables removal over two or three threads in the component to be disassembled.
- The sentence is equipped with side bolts and can thus be combined with separating knives and Tri-Pull tools.

MASTER DATA

GTIN [GTIN]	4021176009136
Country of origin	DE
Material	Tool steel
Series	K-68
Gross weight [kg]	0,3 kg
Package contents	1 piece
Packaging Act	PAPPE PAP 21
Worldwide sales capability	Yes (REACH, RoHS, POP, PROP65, TSCA)

SPARE PARTS

- Power nut
- Powernut
- 68-0_Universal Puller
