K-78-12-A Induction heating device 1200 W 230 V in L-Boxx

DESCRIPTION

The induction heating device K-78-12-A is a power tool for flameless heating of magnetizable metals such as screws or bearings. Through innovative induction technology, heat is generated directly in the workpiece, allowing for extremely fast and precise temperature control. Ideally suited for industrial applications, repairs, or forging and hardening metal. The induction heating device features a maximum electronic power of 1200 watts.

APPLICATION AREA

For warming metals

BENEFIT

- Rapid heating of metal without preheating
- Induction technology only heats the material.
- Precise control of the heating temperature
- Versatile for various applications

MASTER DATA

GTIN [GTIN]	4021176013102
Country of origin	NL
Material	Tool steel
Series	K-78
Gross weight [kg]	4,84 kg
Package contents	1 piece
Packaging Act	PAPPE PAP 21
Worldwide sales capability	Yes (REACH, RoHS, POP, PROP65, TSCA)
