13-C 9-piece Removing device set Ø 25-155 mm/ 400 mm

DESCRIPTION

The 9-piece Removing set 13-C is used for the removal of spherical and tapered roller bearings in crafts, industry and workshops when there is not enough space for jaws. The segments of the TRI-PULL are positioned behind the bearing on the inner ring and thus ensure uniform force transmission across the entire bearing.

APPLICATION AREA

For pulling off ball bearings, roller bearings, inner rings and other parts that lie flat on the surface

BENEFIT

- Application-oriented assembly for universal use
- By storing it in the box, the completeness of the set can be easily overviewed.
