126-15 Brake Caliper Tool

Art.No. 126-00

Art.No. 126-15

DESCRIPTION

The brake piston retractor of the 126-15 series is suitable for quickly and cleanly retracting brake pistons on 6-piston brake calipers – without damaging the seal or the piston. The heavy, robust design also allows use on high-performance brake calipers as well as on particularly large and high-performance brake systems. Especially suitable for brake systems with multiple brake cylinders (e.g., VW Touareg, Crafter, Ford Transit). The tool ensures controlled, non-tilting, and material-friendly work and impresses with its reliable handling in professional workshop use.

BENEFIT

- Compatible with all common vehicle types without an integrated handbrake locking device.
- The puller is suitable for the following vehicles: Touareg, Phaeton, Porsche Cayenne, Audi A8, Q7, BMW M3, etc.
- The solid execution ensures a synchronous resetting of all pistons.
- High stability and wear resistance due to hardened plates and guide pins
- Low force required thanks to precise guidance
- No tilting of the piston during resetting

OPERATION

- Insert the retractor into the brake caliper
- Retract the piston by operating the spindle

MASTER DATA

GTIN [GTIN]	4021176018954
Country of origin	DE
Material	Tool steel
Series	126-15
Gross weight [kg]	0,3 kg
Package contents	1 piece
Packaging Act	PAPPE PAP 21
Worldwide sales capability	Yes (REACH, RoHS, POP, PROP65, TSCA)
