53-14 Stud extractor for tight spaces Ø 14 mm

DESCRIPTION

Series 53 stud extractors with internal toothing are used for screwing in and unscrewing stud bolts or broken-off components in automotive and industrial applications. KUKKO stud extractors are available in various diameters and versions. Thanks to its design, series 53 can also be used in the tightest spaces and is operated using a box or socket wrench.

APPLICATION AREA

To remove stud bolts or broken components in automotive and industry.

BENEFIT

- Operable with 1/2 inch ratchet as well as open-end wrench
- During the extraction, the stud bolt is located in the area of the key and cannot break off.
- Three rollers with a wedge mechanism ensure that the stud bolt is gripped increasingly tightly when rotated in one direction

OPERATION

- Position the stud extractor on the stud bolt
- Drive the extractor with a socket or ring wrench and safely extract the stud bolt

MASTER DATA

GTIN [GTIN]	4021176984563
Country of origin	JP
Material	Tool steel
Series	53
Gross weight [kg]	0,34 kg
Package contents	1 piece
Packaging Act	PAP 20
Worldwide sales capability	Yes (REACH, RoHS, POP, PROP65, TSCA)
