K-127-A/6 Front-end service kit for disassembly and maintenance of swivel caster arms, ball joints, tie rods & wheel bearings

DESCRIPTION

The 6-piece front-end service set is used for disassembling and maintaining steering arm, ball joints, tie rods, and wheel bearings. The set includes a total of five ball joint pullers or presses in different designs and sizes. The bell-shaped ball joint puller 128-1 is recommended for work where there is a lot of space available, while the ball joint press 129-0 can also apply a lot of force in tight spaces, thanks to its lever transmission. The K-127-A set impresses with its versatility and offers an ideal collection of essential tools for the automotive industry.

APPLICATION AREA

For disassembly and maintenance of swivel caster arms, ball joints, tie rods, and wheel bearings

BENEFIT

- Due to its simple yet effective design, the ball joint puller of series 128 is particularly suitable for a quick and straightforward application.
- The bolt on the ball joint extractor of series 219 can be adjusted to flexibly adapt the clamping range.
- The spherical bearing pullers of series 127-A are equipped with a hook eye for attaching a safety line.

MASTER DATA

GTIN [GTIN]	4021176023309
Country of origin	DE
Material	Tool steel
Series	K-127-A
Gross weight [kg]	8,4 kg
Package contents	1 piece
Packaging Act	PAPPE PAP 21
Worldwide sales capability	Yes (REACH, RoHS, POP, PROP65, TSCA)
