K-70-A 18-piece ball bearing puller set "PULLPO" ø 10-30 mm

DESCRIPTION

The 18-piece ball bearing puller set "PULLPO" K-70-A is used for completely non-destructive pulling of deep groove ball bearings without removing the shaft in trades, industry, and workshops. Even without the possibility of support, the PULLPO can securely pull otherwise unreachable bearings, thereby ensuring the reuse of the affected parts. The PULLPO not only impresses with its innovative design but also with its easy application, and the specially developed puller jaws allow for reliable grip during the pulling process and higher extraction forces. The set includes not only the PULLPO but also matching hooks and rings for appropriate application.

APPLICATION AREA

For completely non-destructive removal of groove ball bearings without disassembling the shaft in crafts, industry, and workshops.

BENEFIT

- Application-oriented assembly for universal use
- By storing it in the box, the completeness of the set can be easily overviewed.
- The special crossbar design enables secure and easy suspension and the lever-amplifying self-tensioning of the jaws (PULLPO Technology).
- Four magnets for easy holding of the counter pressure ring

OPERATION

- Choose PULLPO with three or four arms depending on ball bearing size
- Insert the arms/hooks of the puller into the outer ring of the bearing to be removed with the help of the support rings
- Operate the spindle with a torque wrench and safely and gently pull off the bearing this way

MASTER DATA

GTIN [GTIN]	4021176058851
Country of origin	DE
Material	Tool steel
Series	K-70
Gross weight [kg]	1,91 kg
Package contents	1 piece
Packaging Act	PAPPE PAP 21
Worldwide sales capability	Yes (REACH, RoHS, POP, PROP65, TSCA)

SPARE PARTS

- 610120_Mechanical spindle
- 70-01-R_Ring set for 70-01
- 70-01-T_ Replacement crossbar
- 70-011_3 replacement hooks (set)
- 70-012_3 puller hooks (set)
- 700117_Three pressure pieces
