124-K Puller set for all vehicle types

DESCRIPTION

The car pulley puller set for all vehicle types is used for removing multi-ribbed pulleys with a diameter of up to 195 mm in automotive applications. The 2-jaw design allows for space-saving work, which functions in any position and even under full load, thanks to the parallel puller jaws.

APPLICATION AREA

For the extraction of multi-rib pulleys with a diameter of up to 195 mm in automotive.

BENEFIT

- Universally applicable for most vehicle types
- The flange of the spindle neck prevents the slipping of the key.
- The included hook extensions allow adjustment to all given installation conditions.

MASTER DATA

GTIN [GTIN]	4021176736841
