# 102-0 Piston pin press for pistons up to Ø 38 mm

## DESCRIPTION

The piston pin presses of the series 102 are used for the gentle insertion and extraction of piston pins in the automotive industry. The tool enables safe assembly and disassembly of piston pins via pressure pieces without damaging the piston in the process. Item 102-0 contains two additional pressure pieces, while 102-1 is designed for large piston ring diameters and includes three additional pressure pieces.

## APPLICATION AREA

For gentle pressing and pulling of the piston pins in automotive.

## BENEFIT

- Damage-free work on the piston
- Customizable versatile application

## OPERATION

- Remove possible circlips before application
- Unscrew the tension band on one side and adjust it to the piston
- Screw the tension band back in and insert the appropriate pressure piece
- Insert the piston and press the pin by actuating the drive
