127-4 Direct print ball joint puller, with 37 mm jaw opening, 7 t max. tension force

DESCRIPTION

The bell-shaped direct press ball joint puller of series 127 is used to press out the ball pins when removing ball joints as well as tie rod ends on tie rods in automotive and industry. The puller allows for damage-free work and is optimal when there is little space available.

APPLICATION AREA

For the expansion of spherical joints and tie rod ends on tie rods

BENEFIT

- Due to its simple yet effective design, the direct puller ball joint remover is particularly suitable for quick and uncomplicated application.

OPERATION

- Attach puller between ball joint and component
- Torque the spindle with torque wrench
- Threaded pin of the ball joint is pushed out of the component

MASTER DATA

GTIN [GTIN]	4021176123306
Country of origin	DE
