# 31-1 Universal steering wheel puller, up to 60 mm spread

## DESCRIPTION

The universally applicable steering wheel puller is used for gentle removal of steering wheels in various designs. The particularly powerful design of the puller withstands even the strongest loads.

## APPLICATION AREA

For gentle removal of steering wheels in various designs.

## BENEFIT

- Universally applicable thanks to various sizes of insert rings
- Safe setup of the spindle through a swiveling spindle tip on both smooth surfaces and during centering (Switch Technology)

## OPERATION

- Remove the steering wheel fastening screw
- Select the appropriate insert ring based on the diameter of the steering column
- Insert the insert ring into the puller body
- Place the puller behind the steering wheel and pull the spindle manually to apply pressure
- Use a ratchet or a box wrench to turn the hexagon on the spindle head until the steering wheel is dismantled

## MASTER DATA
