K-2030-20+S 15-piece universal puller set (2-jaw and 3-jaw) with two different puller jaw types

DETAIL IMAGE

DESCRIPTION

The 15-piece universal puller set with two different types of puller jaws from series 2030 is used universally for 2-jaw and 3-jaw extraction of gearbox gears, bearings, sprockets, and synchronizers in crafts, industry, and workshops. The series 2030 impresses with its diverse combination possibilities. This set includes the basic equipment of 2-jaw and 3-jaw pullers needed for universal work. Additionally, the set is equipped with two variants of puller jaws to provide even more possibilities in application. The robust design is particularly suitable for large and heavy applications in industry and commercial vehicles and enables the assembly of 14 different variants.

APPLICATION AREA

For universal use in the removal of gearbox gears, bearings, sprockets, and synchronizers in craft, industry, and workshop.

BENEFIT

- Application-oriented assembly for universal use
- Depending on the existing extraction situation, it can be easily adjusted and configured for a variety of applications.
- Through 2-jaw or 3-jaw design, one is always flexible in use.
