11-2-A5 Extra strong, 3-jaw universal puller, up to 650 mm spread, 500 mm reach

APPLICATION IMAGE

DESCRIPTION

The extra-strong 3-jaw universal puller is used for pulling heavy bearings, gears, and discs in all common sizes for crafts, workshops, and industry. It allows you to loosen any component that is mounted on a shaft and is freely accessible from the outside. Equipped with robust and adjustable standard jaws, the solid construction of the puller ensures powerful, non-destructive disassembly during both external extraction and internal extraction. The 3-jaw design guarantees even load distribution and thus a particularly secure grip on the part to be pulled.

APPLICATION AREA

For the removal of heavy bearings, gears, and discs in all common sizes for trade, workshop, and industry.

BENEFIT

- Screw connection allows easy loosening and particularly tight fastening of the jaws with an allen key
- 3-jaw ensures an even distribution of force and allows for greater pulling forces.
- Application also for eccentric components through freely movable, sliding puller jaws on the crossbar.
- Variable adjustment to any spread between 155 mm – 650 mm
- Safe mounting of the spindle with a movable spindle tip on both smooth surfaces and for centering (Switch Technology)
- Optional convertible from an external puller to an internal extractor by reversing the jaws.
- Anti-slip safety (spindle neck) at the spindle head for safe working with a wrench.
- Spindle outlet to protect the thread

OPERATION

- Place the puller jaws from the outside onto the part to be removed
- Slide the jaws under the component
- Use a wrench to secure the jaws
- Manually pull the spindle to fix it under pressure
- Activate the hexagon on the spindle head with a ratchet or a ring spanner until the component is released
