K-78-20-A Induction heating device 2000 W 120 V in L-Boxx

DESCRIPTION

The induction heater K-78-20-A is a power tool for flameless heating of magnetizable metals such as screws or bearing parts. The innovative induction technology generates heat directly in the workpiece, enabling extremely fast and precise temperature control. Ideally suited for industrial applications, repairs, or the forging and hardening of metal. The induction heater features a maximum electronic output of 2000 watts.

APPLICATION AREA

For warming metals

BENEFIT

- Rapid heating of metal without preheating
- Induction technology only heats the material.
- Precise control of the heating temperature
- Versatile for various applications

MASTER DATA

GTIN [GTIN]	4021176013119
Country of origin	NL
Material	Tool steel
Series	K-78
Gross weight [kg]	0,3 kg
Package contents	1 piece
Packaging Act	PAPPE PAP 21
Worldwide sales capability	Yes (REACH, RoHS, POP, PROP65, TSCA)
