DETAIL IMAGE

DESCRIPTION

The 13-piece universal puller set (2-jaw and 3-jaw) with narrow, quickly adjustable jaws of series 2030 is used for pulling bearings, gears, discs, etc. in tight and hard-to-reach spaces in crafts, industry, and workshops. Series 2030 impresses with its versatile combination options. The kit allows for the assembly of 8 different variants through the combination of jaws and extensions.

APPLICATION AREA

For pulling bearings, gears, discs, etc. for tight and poorly accessible spaces in crafts, industry, and workshops.

BENEFIT

- Application-oriented assembly for universal use
- By storing it in the box, the completeness of the set can be easily overviewed.
- Depending on the existing extraction situation, it can be easily adjusted and configured for a variety of applications.
- Through 2-jaw or 3-jaw design, one is always flexible in use.
- Extensions allow the removal of deeply seated components.

OPERATION

- Place the puller jaws from the outside onto the part to be removed
- Slide the jaws under the component
- Use a wrench to secure the jaws
- Manually pull the spindle to fix it under pressure
- Activate the hexagon on the spindle head with a ratchet or a ring spanner until the component is released
