K-220-221-A Puller set for universal puller solutions in a case, up to 150 mm spread

DETAIL IMAGE

DESCRIPTION

The 19-piece puller set for universal pulling solutions of the K-220-221 series is used for central extraction of bearings, gears, and discs in all common sizes for trades, workshops, and industry. This allows any component that sits on a shaft and is freely accessible from the outside to be removed. With this 8-in-1 set, eight different Puller can be assembled: 220-1 and 221-1, 220-2 and 221-2, 220-3 and 221-3 as well as 220-4 and 221-4. Tightening the clamping cone automatically centers the jaws. By operating the clamping cone, the desired spread can be set. In addition, the jaws can be preloaded with the cone to prevent possible slipping. Usable as both an external extractor and an internal extractor (in combination with a sliding hammer or a counter stay) by simply reversing the jaws and the clamping cone.

APPLICATION AREA

For central extraction of bearings, gears, and discs in all common sizes

BENEFIT

- Self-centering of the jaws by tightening the tension cone
- The clamping cone regulates the setting of the desired reach.
- Optional convertible from an external puller to an internal extractor by reversing the puller jaws and the tension cone.

MASTER DATA

GTIN [GTIN]	4021176023248
Country of origin	DE
Material	Tool steel
Series	K-220-221
Gross weight [kg]	10,855 kg
Package contents	1 piece
Packaging Act	PAPPE PAP 21
Worldwide sales capability	Yes (REACH, RoHS, POP, PROP65, TSCA)

SPARE PARTS

- 220-1-33_Clamping cone for BR 220 & 221
- 220-1-T_Crossbar
- 221-1-120-S_3 puller set
- 221-1-T_Crossbar
- 221-2-165-S_3 puller (set)
- 221-3-120-S_3 puller set
- 221-4-165-S_3 puller (set)
- 621220_Mechanical pressure spindle
