128-5 Bell-shaped ball joint puller, with Ø 46 mm jaw opening, 10 t max. tension force

DESCRIPTION

The bell-shaped ball joint puller of series 128 is used for pressing out the ball studs when disassembling ball joints and tie rod ends on tie rods for all vehicle types. The puller allows for damage-free work and is optimal when there is plenty of space available. The series 128 impresses with its fast and easy operating method and is available in various sizes.

APPLICATION AREA

To express the ball pins when dismantling ball joints and tie rod ends on tie rods for all vehicle types.

BENEFIT

- Due to its simple yet effective design, the direct puller ball joint remover is particularly suitable for quick and uncomplicated application.

OPERATION

- Attach puller between ball joint and component
- Torque the spindle with torque wrench
- Threaded pin of the ball joint is pushed out of the component

MASTER DATA

GTIN [GTIN]	4021176024511
